# Space Relations

## DAT for PCA

**Name** John Sample **Date of Testing** 1/11/2011  
**Organization** Pearson Sample Corporation

---

### Performance

**Norm Group:** Hourly/Entry-Level & Blue Collar

### Score Interpretation

John Sample obtained a total raw score of 34 out of 35 possible points on the DAT for PCA Space Relations test.

John Sample achieved a score higher than or equal to 93% of a representative sample in the norm group indicated above. This individual is likely to excel in tasks that require the ability to mentally create and manipulate images derived from written plans. Specifically, in comparison with other individuals from the specified norm group, this individual is likely to:

- accurately imagine how an object would look if made from a given pattern.
- readily visualize how a particular object would appear if rotated in a specified manner.
- review a blueprint or pattern and accurately visualize how the object would look in three-dimensional space.

---

## Skills and Abilities Assessed by the DAT for PCA Space Relations Test:

The Space Relations test measures the ability to visualize a three-dimensional object from a two-dimensional pattern, and to visualize how this object would look if rotated in space. Space relations predict success in positions that require the ability to mentally create and manipulate images derived from written plans.
